

WHEEL CYLINDERS

NUMERICAL INDEX & BUYERS' GUIDE—cont.

Front & Rear = 400 to 402 Front = 403 and Arnolt

Assembly No.	Cylinder Dia.	Fig.	Repair Kit	APPLICATION	Alternative Assembly
25452 Front	1½"	BP.5		Allard, Alvis, Armstrong, Siddeley, Austin, Beardmore, Bristol, Frazer Nash, Healey, Humber, Jaguar, Lagonda, Smith's N.C.B. Electric, Sunbeam-Talbot, Trojan, Wolseley	
25453 Rear	1½"	BX.11	KL.71470	Allard, Armstrong Siddeley, Austin, Bristol, Frazer Nash, Healey, Humber, Lagonda, Lister, Morris Commercial, Morrison Electricars, Seddon, Sunbeam-Talbot, Trojan, Wales & Edwards	

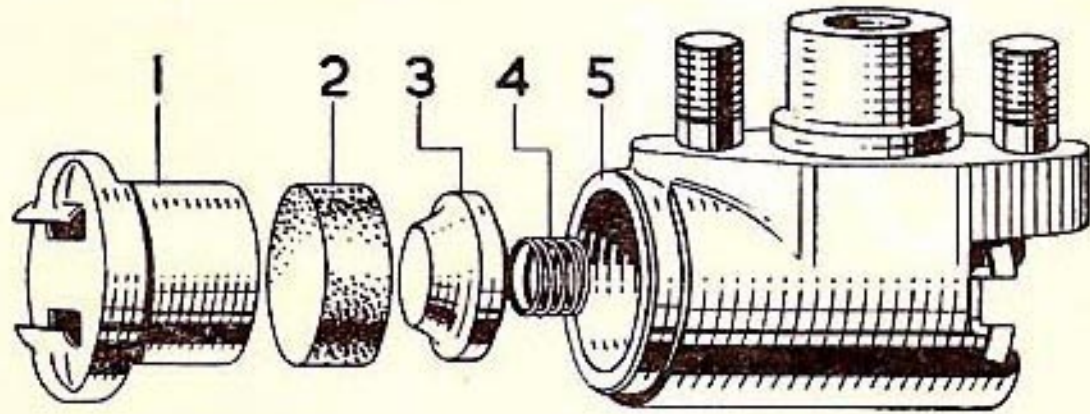

The rear wheel cylinders for 403 - 405 are not listed in the Lockheed Catalogue, it just says they are specials. It is possible that the 403 number is 4243-420 and as they use the same front cylinder, it is also possible that Arnolt's are the same but all of this needs to be verified and cross-checked.

For 405 / 6 comments see the front wheel cylinder.

OLD DESIGN

25453 (BX11) Rear wheel cylinder 401-4 & Arnolt, is the same as 28175 (BX7) except for the handbrake lever. This was replaced by 34348 (BX14 - below) and was listed for Austin, Alvis, Beardmore, Boydell, Lancing-Bagnell, Morris Commercial, Wales & Edwards, Wolseley.

NOTES

- † When replacing a complete assembly always use new design, Assembly No. 33668 (Fig. BX12). Individual items of old design will not interchange with new.
- * When replacing a complete assembly always use new design, Assembly No. 34577 (Fig. BX13). Individual items of old design will not interchange with new.
- † When replacing a complete assembly always use new design, Assembly No. 34348 (Fig. BX14). Individual items of old design will not interchange with new.
- †† When replacing a complete assembly always use new design, Assembly No. 36018 (Fig. BX17). Individual items of old design will not interchange with new.
- ** Handbrake Lever supplied by Vehicle Manufacturer.

Note—*Handbrake Lever supplied by Vehicle Manufacturer.

Boots are not included in any Assemblies and therefore must be ordered separately if required.

BX14 34348 assembly would seem to be the substitute for 25453 rear wheel cylinder but using your existing handbrake lever.
